

JLG Forklift Parts

JLG Forklift Part - After retiring in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

While on their trip, John spent time conversing with former business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a considerable market for a product that could promptly and securely lift people in the air to accomplish upkeep and other construction functions.

After returning from their trip, John set up a business with two of his friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design elements of that original lift into existing designs.

JLG forklifts have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into many marketplaces globally and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
